The screenshot shows a web browser at localhost:3000 displaying a menu application. The page has a title "Menu From Supabase Menu Table" and a subtitle "Ray, 211417075". Below the title are five category buttons: "All", "Breakfast", "Lunch", "Dessert", and "Shakes". The "Breakfast" button is selected. The menu items are displayed in a grid. The first item, "Buttermilk Pancakes", is highlighted with a red box. Its details include a price of 15.59, a description "Lorem ipsum dolor sit amet consectetur adipisicing elit. Quam dolores ut iusto quas quia dignissimos ullam.", and an image of a stack of pancakes. The second item, "Diner Double", is also highlighted with a red box. Its details include a price of 13.99, a description "Lorem ipsum dolor sit amet consectetur adipisicing elit. Quam dolores ut iusto quas quia dignissimos ullam. Enim voluptas, expedita", and an image of a burger and fries. On the right side of the browser, the DevTools console is open, showing the JSON data for the menu items. A red box highlights the entire JSON array, and a purple box highlights the first object, which corresponds to the "Buttermilk Pancakes" item. The JSON structure is: [{"category": "breakfast", "descrip": "Lorem ipsum dolor sit amet consectetur adipisicing elit.
